GUI: On Windows 10 you can find out the path by going to Control Panel > Programs > Java. In the panel that shows up, you can find Switching between different JDK versions in Windows I'm working on few projects and some of them are using different JDK. Switching between JDK versions is not comfortable. So I was wondering if there is any easy way to change it? I found Setting JAVA_HOME environment variable in MS Windows or JRE_HOME if you installed the JRE \(Java Runtime Environment\). In the Variable Value field, enter your JDK or JRE installation path . Open Command Prompt as Administrator. Set the 'Java' is not recognized as an internal or external command Restart the command prompt before checking the version of JDK installed. I spent 02 days on it until my problem resolved when I restarted the command prompt before checking javac - How do I run a Java program from the command line on Assuming the JDK 9+ bin directory is correctly added to your path, you will be able to simply: Run jshell File.java -- File.java being your file of course. A prompt will open, allowing you to call the javac not working in windows command prompt I'm trying to use javac with the windows command prompt, but it's not working. After adding the directory "C:\Program Files\Java\jdk1.6.0_16\bin\" to the end of the PATH environment "java -version" not working in command prompt I downloaded this Java JDK and installed it.
