A 24V battery inverter is a device that converts 24V battery output (DC, or direct current) into 230V mains output required for domestic appliances (AC, or alternating current). It can also function as a backup / emergency power source in case of power cuts. How do I choose the right 24V inverter? Choose the right 24V inverter by adding up the wattage of the devices you want to run, then match it with one of our models. Shop now at RoadKing and get the power you need wherever your journey takes you. What is the cost of a 24V 1200W inverter? A 24v 1200w inverter costs approximately R10 000. This model can power multiple devices such as a television, a computer, a gaming console, an internet router, and one or two lights. Can a single phase inverter output 240V 60Hz? These single phase inverters can be programmed to output 240V 60Hz for North American applications. Couple with an Autotransformer to do neutral forming for 120/240V split phase applications. We can also stack these inverters in three phase configurations to do 230V/400V WYE (50Hz or 60Hz). Which Quattro Inverter should I use? For three phase 120V/208V applications the 120V Quattro inverters should be used.
