How to connect PV module to inverter?PV Connection: Please install separately a DC circuit breaker between inverter and PV modules. The recommended of DC breaker is 600V/20A. It's very important for system safety and efficient operation to use appropriate cable for PV module connection. To reduce risk of injury, please use the proper recommended cable size as below: 4.

How to install an inverter?Install on a wall or strong structure capable of bearing the weight of the machine (18.3kg). Install vertically with a maximum incline of +/- 5 degrees, exceeding this may cause output power derating. To avoid overheating, always make sure the flow of air around the inverter is not blocked. How do I connect a RS485 meter to an inverter?Take out the RS485 cable (terminal marks 'RS485' on one end and 'to Meter' on the other end). Unscrew the swivel nut from RS485 port. Insert the Two-pin terminal with RS485 label into the RS485 port, then fasten the swivel nut. Connect the other end to the Meter. An external ground connection is provided at the right side of inverter. How do I configure a 5G inverter based on a lead-acid battery?Determine the battery charge current limit when inverter operates in force charge status. 5G products support lead-acid battery. Select "Lead-Acid" in the "Battery Select" and configure the following parameters according to different lead-acid batteries. Battery Capacity: Define the capacity of the battery.

How do I connect a battery to my inverter?Power cables use water-proof AMPHENOL connectors. When pull out the power cable, you must press the button as indicated in the right figure. Connect the Battery cable to the inverter and make sure the positive and negative poles are correct. Which meter is installed at a grid connection point?Grid: Meter is installed at the grid connection point. Load: Meter is installed at the load branch circuit. Grid+PV Inverter: One meter is connected at the grid connection point, the other meter is connected at the AC output port of an extra PV inverter. (Eastron Meter supported). There are 5 working modes available.
