### PV string inverter combiner box

What is a PV AC combiner box?The new PV AC Combiner boxes have been designed for PV systems with string inverters in trackers or fix tilt systems.The product portfolio is suitable for inverters from 60 kW up to 200 kW and support voltages of 400 V, 690 V or 800 V AC. The combiner boxes allow to collect from 2 up to 6 string inverters in one single cabinet. How do I connect the PV string combiner boxes?To connect the PV strings, the string combiner boxes are equipped with either our SUNCLIX panel feed-throughs or with cable glands on Push-in terminal blocks. SUNCLIX connectors from Phoenix Contact and Push-in terminal blocks combine the advantages of easy installation with reliable and maintenance-free connection. Can a string inverter be isolated from a PV system?Furthermore, each string inverter can be easily isolated from the system to do maintenance tasks. The new PV AC Combiner boxes have been designed for PV systems with string inverters in trackers or fix tilt systems.The product portfolio is suitable for inverters from 60 kW up to 200 kW and support voltages of 400 V, 690 V or 800 V AC. What is a photovoltaic combiner box?Photovoltaic combiner boxes play a crucial role in solar panel systems, especially in larger installations. They serve as a centralized point where wirings from multiple panels are combined. This allows for a more organized and safer electrical setup. Do I need a solar combiner box?Combiner boxes are required when there are more than three solar strings that need to be connected to the inverter. When working with less than three solar strings, they can be connected directly to the inverter without additional devices. For small residential solar systems with one or two strings, a solar combiner box is not a strict requirement. How many string inverters can a combiner box collect?The combiner boxes allow to collect from 2 up to 6 string inverters in one single cabinet. They withstand ambient temperatures from -20 up to +50°C to operate in hardest climate conditions, fulfilling the highest market standards as per IEC 61439-2 ed 3.0:.
