What is an uninterruptible power supply (UPS)? An uninterruptible power supply (UPS) is a device that's easy to install and provides power to computers, servers, server rooms, and data centres during main energy failures, electrical surges, or unexpected power cutoffs. Where to buy ups in Hong Kong? RS Hong Kong offers a dependable range of high-quality UPS power supply systems online. Whether you're looking to buy a UPS or other backup solutions, you'll find power supplies that meet your immediate and long-term needs. How to Order Uninterruptible Power Supplies from RS? How do I choose the right UPS system? UPS systems support 24/7 operation, preventing any power loss that could compromise security activities. Selecting the right UPS system involves assessing power needs, calculating the total watts required, and determining the necessary runtime to sustain operations during outages. How does the UPS system work? The UPS system automatically selects the power feeding mode to best suit the power situation and load conditions, allowing for seamless mode transitions without output interruptions. The double conversion mode is used under poor power conditions, while economy mode is preferred when conditions are favourable. What are the three modes of a UPS system? This system operates in three modes: double conversion mode, economy mode, and active filter mode. The UPS system automatically selects the power feeding mode to best suit the power situation and load conditions, allowing for seamless mode transitions without output interruptions. What is a power supply system? Supplies power without momentary power breaks in the event of a power outage. A system where, normally AC input (utility power) is output as is to connected devices and when a power outage or abnormal voltage is detected, the inverter starts feeding using power from the batteries.
